The Perfect Finish

When you buy a PVCu infill panel for your front door, you can rest assured you are investing in a quality product. PVCu doors are low maintenance and secure.

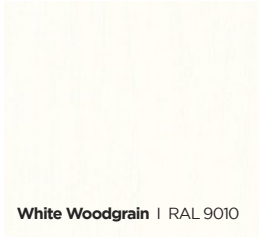

Every door is available in white or woodgrain effects, Rosewood, Light Oak, Mahogany or Irish Oak. All woodgrain options are finely crafted to look realistic, but unlike wood they are guaranteed not to crack, peel or fade; so you can create the warmth that wood offers, without the hassle. There is also a new range of foiled colours such as the popular Anthracite Grey and Chartwell Green. You can also combine white and woodgrain finishes, so for example, you could have woodgrain on the outside to match the exterior features of your home, and white on the inside providing you with a neutral finish for your interior.

All glass is toughened (kite mark bs6206) and all door panels meet class 1 surface spread of flame classification BS476 part 7. Due to the nature of the product, no liability can be accepted for the accuracy of colours or designs shown which are intended for guidance only. All the door panels in this range comprise of two PVCu skins, pressure bonded to a core material of E.H.D.F.R. A polystyrene (extra high density fire retardant additive) using a specially formulated adhesive that is both heat and moisture resistant. The result is a core free from CFCs and a skin that isapproved to BS476:part12 'Method of Test for Ignitability of Products by Direct Flame Impingement'. This offers a high degree of thermal efficiency and, by using our range of reinforcing options, a high degree of security.

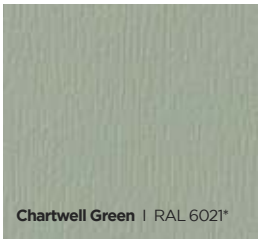

Foiled Colour Options

* Nearest match. RAL numbers are given in good faith but are for reference only. We take no responsibility for other materials not matching our finish.

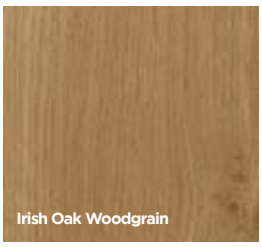

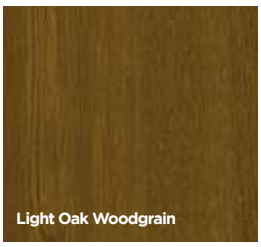

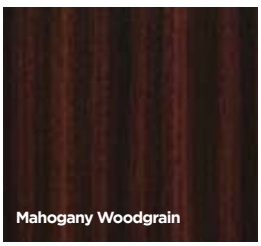

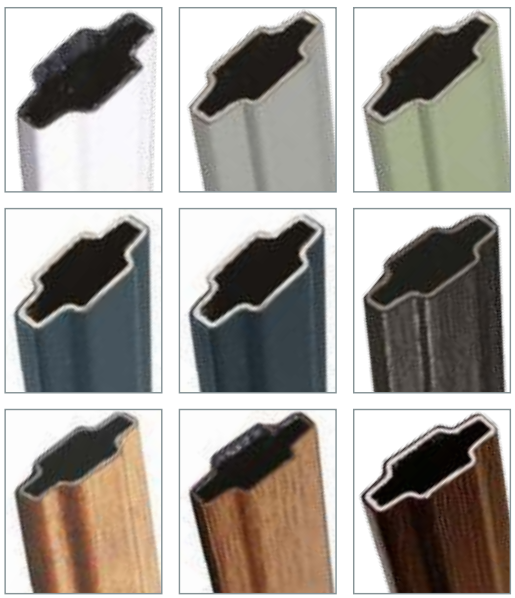

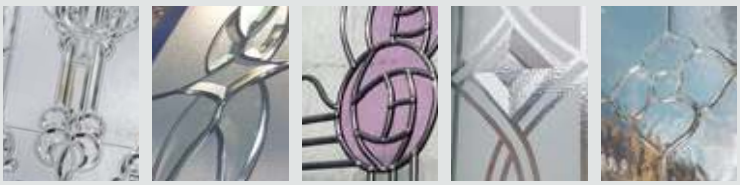

Georgian Bar Options

Georgian bars are available in White, Agate, Chartwell Green, Slate, Anthracite, Black, Irish Oak, Light Oak and Rosewood foil finishes. All have White on the reverse except for Anthracite, Black, Irish Oak, Light Oak and Rosewood which are on both sides.

Glazing Options

Resin Bevel (BP) - No backing glass option available ▲
Each design is carefully sealed between two panes of glass for ease of cleaning, This glass will not shatter but will hold together even if broken. Each resin is obscure and the design will occasionally produce minor imperfections that are generallyregarded as acceptable. The resin is glazed on the inside piece of glass facing outwards.

Bevelled Glass (DB)
Traditional handcrafted and bonded to the glass with an optically clear resin, then overlaid with lead. These timeless designs will complement that period home.

Stained Units (CD) (CL)
Combining traditional lead work with coloured film, these designs replicate that stained glass appearance. All stained units are individually hand made and the coloured film may at times, vary slightly from the computer generated brochure.

Sandblasted / Etched Glass (TD) (DB)
This handcrafted glass is now produced using modern technology and is designed to give a traditional appearance. For a more dramatic effect, this is often combined with striking glass bevels. Though generally obscure, it does leave various areas clear.

Silver Grille (DB)
Our Silver Grille options feature attractive traditional motifs that are created using a highly polished chrome framework that is sealed within the double glazed units. Each Silver Grille design is available with a choice of backing glass.

Back Door Solid

Amatis Collection

Stylish inverse moulding is the latest feature to be introduced to the PVC-U panel door and has proved to be popular with home owners, which is why we have extended our range to provide you with even more styles to choose from.

On most PVC-U doors, the mouldings are raised from the door. However, with the Amatis inverse collection, the mouldings recess into the door. This creates a more elegant, slimline look that resembles the traditional carved lines of timber, but still has the low maintenance benefits of PVC-U so you get the best of both worlds.
